DETAILED ACTION

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al.US 6,140,418.
- 3. This patent shows rubber compositions that can be used in sealant applications, see the abstract. The patent further shows the pulverizing of a rubber base material, see column 11 lines 1+. Powdered materials are shown as functional additives at column 10 line 13+. The patent suggests incorporating the functional additives and pulverizing the rubber in their presence, column 11 lines 1+. The difference between the cited art and the claims is the lack of an anticipatory example. The claims are rendered obvious given the disclosure of the claimed materials and the suggestion to pulverize the rubber in the presence of the powdered additives.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
